WORK EXPERIENCE

Full-stack software developer
Rehype.de

08/2022 - Present   *Remote, Germany*

Rehype specializes in providing a platform for merchants to sell refurbished electronics.

Achievements/Tasks

- Developing a shop, sellers and admin panel from scratch, including back-end services, front-end interface, and database
- Implemented a microservices architecture that improved system modularity and reduced dependencies between components
- Configured and managed Kubernetes clusters to ensure high availability and scalability of applications
- Integrated a variety of third-party services, including payment gateways (Stripe), shipment providers, and email systems to streamline operations and enhance functionality across platforms

Full-stack web developer
StackTec

03/2024 - 07/2024   *Remote*

Achievements/Tasks

- Developed a full-stack web application using Nextjs on the front-end, Nodejs on the back-end and PostgreSQL for the database
